PROFESSIONAL SUMMARY

IT Support Specialist with 3+ years of on-site help desk and desktop support experience in enterprise environments in Saudi Arabia and Pakistan. Currently supporting 55+ users at a security-controlled multinational energy site (Sinopec Petroleum, through EFFC) in Riyadh: Windows 10/11, Microsoft 365, Active Directory, LAN/WAN networking and the full IT asset lifecycle. Resolves Tier 1 and Tier 2 incidents within SLA using ITIL-aligned incident, problem and service request management in ITSM ticketing systems, and writes the SOPs and knowledge base articles that keep repeat tickets down. BSc in Information Technology; preparing for CompTIA Network+.

CORE SKILLS

Help Desk & Desktop Support: Tier 1 / Tier 2 Technical Support, Service Desk Operations, End-User Support, Deskside and Remote Support (RDP, TeamViewer, AnyDesk), Hardware and Software Troubleshooting, Printer and Peripheral Support, User Onboarding and Training, Customer Service

ITSM & ITIL: ITIL v4 Practices (Incident, Problem, Change and Service Request Management), ITSM Ticketing Systems (ServiceNow, Jira Service Management), SLA Management, Ticket Triage and Escalation, Root Cause Analysis, Knowledge Base Articles and SOPs

Microsoft & Endpoints: Windows 10/11, Windows Server, Active Directory (Users and Computers, Group Policy / GPO), Microsoft 365 Admin Center, Exchange Online, Teams, SharePoint, OneDrive, Microsoft Intune (basic), Desktop and Laptop Imaging and Deployment, Bulk Software Deployment, BitLocker, Hyper-V, VMware

Networking & Security: TCP/IP, DNS, DHCP, LAN/WAN, Wi-Fi, VPN, Routing and Switching, Proxy Server, Network Troubleshooting, Access Control, Multi-Factor Authentication (MFA), Endpoint Security / Antivirus, Patch Management, Data Confidentiality

IT Asset & License Management: IT Asset Lifecycle (Procurement to Retirement), Asset Tagging and Inventory, Software Asset Management (SAM), License Compliance, Microsoft 365 Licensing, Vendor and Procurement Coordination

Scripting & Documentation: PowerShell, CMD / Batch Scripting, Technical Documentation, Reporting to Management

PROFESSIONAL EXPERIENCE

IT Support Specialist | EFFC (on-site at Sinopec Petroleum Branch)

Riyadh, Saudi Arabia

Jan 2025 – Present

- Resolve 15+ incidents and service requests per week for 55+ end users on a security-controlled energy site, keeping SLA compliance above 95% by logging, prioritizing and closing every ticket in the ITSM system under ITIL incident and request management.
- Cut new-device setup time from about 4 hours to under 90 minutes across 60+ Windows 10/11 desktops and laptops by building a standard configuration checklist and a bulk software deployment process.
- Complete 100% of joiner, mover and leaver requests within one business day by administering Active Directory (user provisioning, password resets, group policy, access control) in line with corporate security policy.
- Reclaimed 10+ unused Microsoft 365 licenses across two quarterly reconciliations by checking assignments against active users; manage Exchange Online mailboxes, Teams and OneDrive access for the site.
- Restore connectivity for network incidents in under 1 hour on average by diagnosing LAN/WAN, DNS/DHCP, Wi-Fi, VPN, switch and router faults independently.
- Achieved 100% record accuracy on two periodic asset audits by maintaining the register for 150+ hardware and software assets (procurement tracking, tagging, maintenance, license records), and close every license compliance risk found in quarterly reviews.
- Reduced repeat tickets for common issues by about 30% by writing 15+ SOPs and knowledge base articles and running knowledge-transfer sessions for project teams and new IT staff.
- Supervise 2 IT support staff, send weekly reports to senior management on ticket volumes, risks and rollout progress, and coordinate with vendors on procurement, repairs and warranty claims, all within site industrial security and data confidentiality rules.

- Resolved 30+ tickets per week for 130+ on-site users covering hardware, software, printers, peripherals and business applications, meeting SLA targets on 92% of incidents by logging, categorizing and prioritizing every request in the ITSM ticketing system under ITIL practices.
- Reached a first-contact resolution rate above 70% by troubleshooting Windows 10/11, Microsoft 365 (Outlook, Teams, OneDrive), printers, VPN and login issues at the desk, over the phone and through remote desktop tools.
- Onboarded new users within one business day by creating Microsoft 365 accounts, assigning licenses, configuring mailboxes and setting up their desktop or laptop, including first login and MFA.
- Handled 50+ Active Directory requests per month (user provisioning, password resets, group membership, access changes) and enforced software usage policy through domain and proxy server configuration.
- Installed, configured and tested business and productivity software on 130+ desktops and laptops, and kept asset and installation records current through structured tagging, reaching 98% inventory accuracy at the annual audit.
- Cut repeat incidents for recurring application and performance problems by about 20% through root cause analysis and permanent fixes, and escalated Tier 2/3 issues with complete diagnostic notes to shorten resolution time.
- Kept office LAN/WAN connectivity stable by troubleshooting routers, switches and network configuration issues.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology | University of the Punjab, Pakistan

Major: Networking and Programming

CompTIA Network+ (N10-009): currently preparing for the exam
